

Choosing A Team Challenge

To preview the Team Challenges in full, you'll need to add your Team Number to the Resource area and then access your team's dedicated page. (Note: If the original Team Number purchaser, such as a school coordinator, has already set up your team in our system, you can skip Step 3 below.) After adding a team to the Resource Area, the Team Manager will be able to view the Challenges in full and make the team's final Challenge selection. To complete the process, follow the steps below:

1. Log in to the Resource Area. If you do not have an account, click the "Welcome" tab and select "Create New Account."
2. Go to the "Teams" tab and select "My Teams."
3. Click the "Add Team" button in the "Actions" pane. Enter the Team Number and Order Number OR enter the Team Number and purchaser's zip code. Then click "Add Team Manager."
4. Click the pencil icon next to your team's listing. This will take you to the "Edit Your Team" page.
5. Select your Challenge Level and then select a Team Challenge using the corresponding drop-down menus. (Please note that Rising Stars teams will only have access to their noncompetitive Challenge and will not have access to our competitive Team Challenges.) Click "Save."
6. Click the "View" button in the "View Digital Challenge" pane. This will allow you to preview the full Team Challenge you selected. If you would like to view another Team Challenge, select it from the "Challenge" drop-down menu and click "Save." Then click the "View" button in the "View Digital Challenge" pane.
7. Your team's Challenge selection can be changed at any time and/or multiple times. However, you must make sure that the final Challenge selected is the one your team plans to solve and present at a tournament or showcase. For more information on deadlines to select your final Team Challenge, please contact ad@gadi.org
